BRAHMI ABBES

Laravel Backend Developer

Bir El Ater, Tébessa, Algeria | aa.brahmi@ensta.edu.dz | +213551376996
GitHub | LinkedIn

PROFILE

Backend Developer specializing in Laravel and PHP with experience building production-ready full-stack web applications. Strong foundation in backend architecture, database design, authentication, authorization, testing, and deployment. Passionate about writing maintainable, scalable software and eager to contribute to a collaborative engineering team as a Junior Laravel/PHP Developer.

PROJECTS

Pharmacera — Pharmacy Management System

github.com/Brahmi-Abbes/pharmacera — *Laravel, Filament, MySQL, Docker*

- full inventory, sales, and reporting system for a pharmacy: role-based access (Admin/Pharmacist/Cashier), FIFO stock management with expiry tracking, and PDF reporting.
- Implemented barcode-scan-to-sale, an activity log with full audit trail, and automated low-stock/out-of-stock email alerts.
- Shipped full Arabic (RTL), French, and English localization across every screen.
- Covered core business logic (stock deduction, overselling prevention, alert triggers) with automated tests (Pest).
- Containerized with Docker and deployed to a live production environment.

DevDz — Community Platform for Algerian Developers

github.com/Brahmi-Abbes/DevDz — *Laravel 11, Tailwind CSS*

- A platform for Algerian developers to share projects, find jobs, and ask questions.
- Designed reusable Blade components with Tailwind CSS while maintaining a modular and scalable codebase.

EXPERIENCE

IT Department Intern — Entreprise Nationale Sonatrach (TRC / GEM Gazoduc)

April 2026 — 1 week

- Observed enterprise IT infrastructure and day-to-day operational workflows within the IT department.
- Gained exposure to professional IT environments, system administration practices, and organizational technology operations.

EDUCATION

École Nationale Supérieure des Technologies Avancées (ENSTA)

Bachelor in AI Engineering — Borj El Kiffan, Algiers, Algeria

SKILLS

Backend: Laravel, PHP, Filament, MySQL, Firebase, MVC architecture

Tools & Practices: Docker, Git/GitHub, Pest (testing), Role-based access control, GitHub Actions(CI/CD)

Frontend: Tailwind CSS, responsive UI

Languages

Arabic: native

English: professional working proficiency
